OBJECTIVE

I intend to go through several experiences that will help enhance my intended future in computer science. I am always open to new things and ideas and love to learn new concepts that will help my future. I would like to involve myself in different software and methods, creating programs and applications, and much more!

EDUCATION

Queens College, NY 11367
BA in Computer Science — *Expected May 2024*
Relevant Coursework: — Cumulative GPA: N/A

- Object-Oriented Programming in C++

Queensborough Community College, NY 11364
A.A.S in Internet and Information Technology — *Achieved May 2022*
Relevant Coursework: — Cumulative GPA: 3.861/4.0

- Web Technology (Dreamweaver; *HTML & CSS*)
- Creating Smartphone Apps (Atom; *HTML & CSS*)
- Web Client Programming (Dreamweaver; *JavaScript*)
- Java Programming (Android Studio; *Java*)
- Programming and Applications (Thonny; *Python*)
- Linux Operating System (Linux)
- Advanced Web Multimedia Programming (Exposure to *AWS Foundations, Angular, & Ruby*)
- Operating System and Deployment (Windows 10)
- Networking (CISCO Packet Tracer, OSI Model, Starting and Configuring Networks)
- Database Technology (Exposure to *AWS Architecture, Ruby, Rails, C.R.U.D*)
- Computer Network Security (Security Design and Vulnerabilities)
- Robotics (Robotic Construction, Programming with C, ROBOTC, KISS IDE)

SKILLS

• Interpersonal and communication skills • Acknowledged in Figma, Adobe Illustrator, Microsoft Word, Excel, PowerPoint, Linux, and Windows 10 • Acknowledged in creating basic websites and publishing them to the internet • Acknowledged in the basics of computer coding languages such as C, Ruby, SQL, Python, JavaScript, Java, HTML, and CSS • Acknowledged in basic networking fundamentals to design, build, and maintain networks • Time Management • Exposure to AWS Foundations and Architecture and AWS Cloud Practitioner Certified

PROJECTS

Ruby on Rails Blog App and HR Resume Database App **May 2022**

- Created a Rails application using basic principles of MVC and RESTful design through the use of a well-written guide.
- App was created using Ruby on Rails in AWS Cloud9 cloud-based IDE.
- It consisted of a connection to a database, general layout of a Rails application, MVC, and RESTful design using CRUD.
- Storage and update of application was done through GitHub.

Exercise Android App   **May 2021**

- Designed and coded an android app using Java that would allow the user to have a guide on different muscle workouts.
- App was created through basic Java elements and contained buttons, links, embed video, and images.

Children's Smartphone App   **January 2021**

- Designed and coded an app using HTML and CSS that contained a child friendly user-interface and allowed for child interaction.
- App was created through elements such as slideshows, animations, navigations, sounds, buttons, containers, and proper formatting.

Community Website   **May 2020**

- Designed and coded a website using HTML and CSS that would highlight a community in New York and give information about the community.
- The website was created through basic elements such as different pages, navigations, data forms, images, containers, headers, footers, and CSS formatting.
